

● ABOUT ME

A passionate software developer with 6+ years of full-stack experience building impactful solutions using React, Next.js, Node.js, .NET Core, SQL Server and AWS/Azure. After spending time in management, and leading projects and teams, I recently decided to return to hands-on development, where my career initially began and where my true passion lies. I am driven by solving complex challenges and continuously improving the quality and efficiency of the software I create.

● SKILLS

Frameworks

React, Node.js, Next.js, Express.js, React Native | ASP.NET, .Net Core, .Net Framework, MVC, Entity Framework

Programming Languages

Javascript, TypeScript | C# | SQL | Python

Databases

SQL Server | MySQL | PostgreSQL | MongoDB

Tools

Docker | Git | Azure/AWS | WebSockets | Postman | Jira | Figma | Selenium | Cypress

Security & Authentication

OAuth | JWT

Soft Skills

Leadership | Communication | Problem-solving | Adaptability

● WORK EXPERIENCE

AUTOMATEDPROS – PRISHTINA, KOSOVO

● SENIOR FULL-STACK SOFTWARE ENGINEER – 07/2023 – Current

After deciding to return to my passion for development, I transitioned back into a hands-on developer role, contributing to two key projects.

- Engineered a real-time restaurant order platform with React, Next.js, TailwindCSS & WebSockets, synchronizing POS and kitchen screens and eliminating manual order calls.
- Built dynamic routing and order-processing logic in Next.js that keeps ticket flow under 1 s from placement to kitchen display, sustaining peak throughput of 150+ orders/hour.
- Devised a modular architecture ready for third-party integrations (delivery partners, payment gateways), cutting future onboarding effort by an estimated 40 %.
- Crafted a responsive UI with ShadCN components, boosting task completion for kitchen staff on 10" tablets from 83 % to 98 % in usability tests.

Project Lead (React, Next.js) – QA Management System

- Developed a QA Management System with React, Next.js, and TailwindCSS, creating a dynamic template engine that let QA teams define test cases which were automatically converted into executable APIs.
- Implemented a custom integration layer via API routes to run tests on demand and stream real-time results, accelerating feedback loops.

- Built a centralized dashboard with ShadCN components for logging outcomes, generating reports, and tracking historical data, giving QA and engineering teams a single source of truth.
- Integrated the platform with the company's project-management tool through REST APIs so failed tests automatically created and assigned tickets, eliminating manual triage and ensuring rapid resolution.

● **CHIEF EXPERIENCE OFFICER** – 11/2021 – 07/2023

- Led and oversaw customer experience initiatives, ensuring smooth and efficient interactions between support, QA, and development teams.
- Spearheaded the selection and implementation of support tools, ensuring seamless integration with the management system and streamlining issue resolution processes.
- Managed and guided the entire QA team, determining the tools and technologies used for testing and quality assurance, including automated testing frameworks and bug-tracking systems.
- Coordinated with development teams, assigning tasks and prioritizing bug fixes or feature enhancements based on feedback from support and QA teams, ensuring effective resolution of critical issues.
- Implemented cross-team communication strategies to ensure that development, support, and QA teams remained aligned on project goals and deadlines.
- Monitored the overall customer satisfaction and experience metrics, adjusting processes and implementing solutions based on data-driven insights to improve user interactions with the management system.
- Managed the delivery of product updates, ensuring QA testing coverage and that support teams were fully equipped with knowledge of new features before deployment.

INFOTECH L.L.C – PRISHTINA, KOSOVO

● **.NET CONSULTANT** – 01/2022 – Current

- Provide on-call architecture and performance triage, cutting query response times by up to 60 % in critical workflows.
- Led mini-audits & code reviews that shaved 15 % off AWS hosting costs through targeted refactors.
- Mentored 6 junior developers, accelerating onboarding time from 4 weeks to 10 days via paired sessions and playbooks.
- Authored quick-fix patches that restored business-critical services within 2 h of incident notification, maintaining 99.9 % uptime.

● **.NET DEVELOPER** – 08/2019 – 01/2022

- Supported and enhanced a comprehensive .NET desktop application for business management covering inventory, sales, tax documentation, POS, restaurant orders, car repair, and fuel-pump control.
- Improved Inventory Management accuracy by integrating live sales data for reliable stock tracking.
- Upgraded Sales module to automate invoice generation, reporting, and customer management.
- Collaborated with finance to streamline tax-document generation, ensuring regulatory compliance.
- Streamlined POS transaction processing, enabling real-time inventory updates.
- Supported Restaurant Order Management, improving order tracking, kitchen workflows, and billing efficiency.
- Integrated car-repair parts tracking and service scheduling, reducing car-parts load time by 87 % (15 s → 2 s).
- Implemented remote fuel-pump activation and deactivation logic aligned with safety protocols.
- Project Lead (.NET MVC) – Logistics & Delivery Web Solution: designed user registration, order placement, real-time tracking, responsive UI, and optimized database for high-volume order processing.

.NET DEVELOPER – CREA-KO – 01/2019 – 07/2019 – PRISHTINA, KOSOVO

- Assisted in migrating a web-based ERP system from .NET Framework to .NET Core MVC, refactoring both front-end and back-end code to enhance performance, scalability, and alignment with the .NET Core MVC architecture.
- Refactored front-end and back-end code to align with .NET Core MVC architecture, improving the performance and scalability of the web application.
- Replaced 12 deprecated NuGet packages, eliminating 100+ security warnings in CI builds.
- Coordinated compatibility fixes across 4 devs, clearing blocker issues two weeks ahead of the cut-over date

BEAUTYQUE – PRISHTINA, KOSOVO

● **PROJECT MANAGER** – 04/2018 – 12/2018

- Managed end-to-end project lifecycle for the development of e-commerce and landing sites, ensuring timely delivery and quality standards.
- Adopted agile sprints and Trello boards.
- Collaborated with key stakeholders, including marketing, sales, and product teams, to align the websites with business goals and brand identity.

- Standardized QA checklists, cutting post-launch defect reports by 40 %.

DIGITAL MARKETING MANAGER – 12/2017 – 04/2018

- Grew social reach by 120 % and email CTR by 35 % through data-driven A/B campaigns.
- Negotiated 15 influencer partnerships to enhance brand awareness and reach target audiences.
- Tuned Google Ads & Meta budgets to hit 4.8× ROAS while staying 12 % under spend cap.
- Analyzed website traffic and customer behavior using Google Analytics, improving website performance and conversion rates.

TECHNICAL SUPPORT AGENT – BIT BY BIT – 06/2017 – 12/2017 – PRISHTINA, KOSOVO

- Resolved IPTV incidents with a 92 % first-call resolution rate across 40+ tickets/day.
- Authored troubleshooting SOPs that lowered average call time from 8 min to 5 min.

CALL CENTER AGENT – TREGI KOSOVO – 05/2016 – 09/2016 – PRISHTINA, KOSOVO

- Outperformed team quota by 15 % through consultative upselling.
- Logged 100 % of interactions in CRM, improving data accuracy for future campaigns.

EDUCATION AND TRAINING

Prishtina, Kosovo

BACHELOR'S DEGREE, COMPUTER SCIENCE Kolegji Riinvest (Riinvest College)
